

AIR DISINFECTION BY UV-c RAYS

## Clinics and pharmacies

Scarecrow is the 100% safe instant air disinfection and purification machine.

### Why use UV-c disinfection?

UV-c disinfection is totally safe thanks to Scarecrow's unique technology. It disinfects the air by neutralising bacteria and inactivating viruses and pathogens in any enclosed room. This generates a constant purification of the air, following the recommendations of the Ministry of Health. Scarecrow ensures a clean and purified environment in rooms and closed rooms in which all people, regardless of their age, can continue to carry out all types of activities. It is an ideal solution for pharmacies, clinics and health centres. With an advanced forced ventilation system, it hides ultraviolet radiation, guaranteeing the absolute safety of the people living in the area to be disinfected. It incorporates active carbon filters, as well as HEPA H13 filters to clean the air of suspended particles such as dust or pollen. With Scarecrow it guarantees and provides a clean and safe environment to preserve people's health.

### UV-c Cleaning Features

- + The UV-c disinfection system uses ultraviolet radiation to **eliminate the harmful agents in the environment.**
- + Neutralizes hanging pathogens and removes dust and pollen particles.
- + Incorporates **active carbon filters and HEPA H13 filters** to clean the air of any other type of suspended particles such as dust or pollen.
- + Unlike other chemical cleaning methods, radiation by means of UV-c provides a fast and **efficient inactivation of all type of microorganisms harmful to humans.**
- + The great advance in our disinfection towers is that **they do not generate direct exposure to UV-c rays** when sanitizing. The UV-c radiation is harmful to human sight and skin; However, our ventilation and air circulation system eliminates any danger to the occupants of the room.
- + Thanks to this circuit it is able to disinfect an inhabited area, with any type of activity; shops, offices, hotels, restaurants, healthcare facilities or homes. Our forced ventilation and recirculation system neutralizes all pathogens in suspension by **purifying and by constantly disinfecting the air in a 100% safe manner.**
